

Evolve to a paperless world where signing an agreement is easy for everyone

Overview

eSignPlus is a document management solution designed to evolve the way you and your organisation share and manage your standard documents and agreements - on any device, from anywhere. Eliminate the continual stress of ensuring that your branding remains consistent or that your team is using the most up-to-date version of a legal document. With eSignPlus, you can securely sign any number of documents digitally, in real time and with immediate document status updates.

The eSignPlus platform enables you to store your signed agreements securely with no hidden costs and remove hard-to-read, and even harder-to-file, documents from your business entirely.

Benefits to your Business

Enhanced customer experience

Upgrade your brand to an enhanced digital experience while making life easier for everyone you transact with.

White label all communications and client facing interfaces to ensure your customers feel secure knowing who they are signing a contract with. This can be arranged at an additional, once off fee.

Rapid transactions and real-time communication

Speed up the process and complete applications and agreements faster by sending document templates to multiple recipients for signing at one time. Send automatic notifications to signatories who can sign immediately on any device.

Free up time and business resources

Spend less time driving to client visits and more time driving your business forward.

Upgraded storage and security

Upgrade to a digital document storage solution that is unlimited and automatically secures the data that is processed in your business.

Created for the property sector

eSignPlus was created for the rental property sector to transact securely and remotely with the focus to specifically meet the unique needs of LeasePack subscribers.

Key Features

- Create, edit, and maintain a central repository of documents for your franchises
- Ensure your brand is easy to recognise and that branding is used uniformly throughout your organisation
- Distribute your documents throughout your organisation and onto eSign instantly, replacing all previous versions of a document automatically
- No need to use Word or PDF editor to update your documents manually
- Send any number of documents to be signed with no monthly limits or unpredictable charges per signature.
- Save time with automatic notifications sent to your signatories
- Send document templates to multiple recipients for signing at one time
- Stay updated with real-time status alerts on your documents
- Create an URL link to allow applications to be completed directly from your property listings
- Receive online applications pushed directly to you
- Store all signed documents in one safe place
- Increase security with signatures that are traceable through two-factor authentication
- Easily maintain all documents on any desktop or mobile device
- Get unlimited, cloud-based filing space to store all your documents

How it works (eSignPlus)

Create

Use standard TPN Document Packs to create or edit a new document, template, or form.

Apply your own branding

Rebrand all your documents using a centralised setting on the eSignPlus platform.

Publish

Immediately access your documents to use on the eSign platform.

How it works (eSign)

Create

Use the 4-step wizard to easily create and send documents for signature.

Check

Verify all email and mobile numbers securely through automatic 2-factor authentication.

Update

Receive automated communication and real-time email notifications to stay updated on document status.

View

Access a snapshot of account activity on the dashboard with quick links and a 'commonly used document list' for efficient navigation.

Manage

Create folders for easily accessible, unlimited document saving. Manage TPN document versions to ensure that only the latest version is utilised.
